

“A Testimony From God: The Rain” Take Home Page

Big Idea: God created the rain to be a testimony to all people of His greatness

Memory Verse Review: “Yet He has not left Himself without testimony: He has shown kindness by giving you rain from heaven” Acts 14:17a

At Home Activity: The Water Cycle

Learn more about the wonderful water cycle that God has created. Have your child fill a clear plastic container with about one inch of water. Seal the container with cling film and place it in a sunny window. Have your child observe what happens after several hours and days. Read Job 36:27-28 to explain what has happened in the container.

At Home Activity: The Gift of Water

Do an experiment to demonstrate the importance of water. Give your child two small paper or plastic cups. Place potting soil in each cup. Place 2 or 3 flower or bean seeds in each cup (follow directions on the seed package for planting depth). On one cup write “NO WATER”. Have your child water the seeds in the other cup as needed. Practice this week’s memory verse each day as you check on your seeds! Wait a week or two and see what happens. Emphasize that not only do plants need water to continue growing, they also need water to even begin growing!
